I'm an experienced software engineer and a full-stack developer, with 6+ Years of experience. I usually talk about tech stacks like Node.JS, NextJs, ReactJs and PHP. I have worked with various front-end frameworks and back-end frameworks, designed REST APi's, and worked with many types of databases MySQL, PostGres, and MongoDB. Additionally, I have experience with Python, Django, and the Frappe ERP framework.

WORK EXPERIENCE

Software Developer 3
Zuru Tech PVT LTD

11/2023 - Present

Achievements/Tasks

- I conduct code reviews to ensure high quality and adherence to best practices, mentor junior developers to support their growth, and develop and maintain key services and features.

Tech Lead
Excellent Web World

08/2023 - 10/2023

Achievements/Tasks

- Conducting code reviews to maintain quality, mentoring junior developers, actively developing core services, and participating in client calls to ensure alignment on project requirements and technical solutions.

Software Engineer
Hiddenbrains Infotech PVT LTD

10/2021 - 08/2023

ed efficiency and innovation.

Achievements/Tasks

- Mentoring junior developers while actively developing and integrating core services and features into the existing product.

Fullstack Software Developer
Align Connect PVT LTD

06/2020 - 10/2021

Achievements/Tasks

- Developing and integrating core services and features, and additionally working on the complete project.

Software Developer
Finbyz Tech PVT LTD

06/2019 - 02/2020

Achievements/Tasks

- Actively developing and integrating core services and features into the existing product. Additionally, I got a chance to work with multiple techs like Python, Node.js, and Electron.js.

SKILLS

NodeJs   Express.JS   ReactJs   NextJs   PHP

MySQL   MongoDB   Postgres   JavaScript

Git   Electron Js   Socket Programming   AWS

Langchain.js   Prompt Engineering

RECENT PROJECTS

ChatBot

- A chatbot with our Facebook and Instagram business pages using the Facebook Meta API. Powered by ChatGPT and LangChain, it provides instant, intelligent responses to user messages, enhancing engagement and streamlining communication.

MRS OIL & GAS

- I managed the entire transportation cycle for oil and lubricant products, coordinating logistics from extraction points to distribution stations.

Ar Ayurveda

- This is an e-commerce website with features like product inventory, blogs, Razorpay checkout, SEO optimization, and a lot more.

Lead Management System

- System is designed to streamline the handling of leads from AR Ayurveda and other sources. Team leaders can assign leads to individual team members. Additionally, team members can update the system with customer feedback.

React content shimme

- I've developed and deployed a React package, which enhances user experience by providing a smooth shimmer effect for loading states in web applications

Simplet Framework

- I've developed my own PHP framework that includes migration functionality, allowing developers to create, alter, and drop tables with ease. Additionally, it features a streamlined routing system inspired by Express.js and Laravel, enabling developers to define routes and render views
